

AMENDMENTS TO THE CLAIMS

The listing of claims below replaces all prior versions of claims in the application.

1. (Currently Amended) An antiseptic disinfectant containing
one or more materials selected from a group consisting of 1,2-heptanediol, 1,2-nonanediol, and 1,2-decanediol, and
one or more materials selected from the group consisting of ~~thymol~~, eugenol, citronellal, terpinyl acetate, citronellol and β -pinene.
2. (Currently Amended) An antiseptic disinfectant, containing 1,2-alkanediol with 5-10 carbons, and one or more materials selected from the group of ~~thymol~~, citronellal, terpinyl acetate, citronellol and β -pinene.
3. (Previously Presented) An antiseptic disinfectant described in claim 2, wherein said 1,2-alkanediol is 1,2-octanediol.
4. (Currently Amended) Cosmetics and toiletries comprising;
a cosmetically effective agent,
1,2-alkanediol having 5-10 carbons, and
one or more materials selected from a group of ~~thymol~~, citronellal, terpinyl acetate, citronellol and β -pinene;
wherein said cosmetics and toiletries are suitable for use on humans or animals.

5. (Currently Amended) Cosmetics and toiletries

comprising;

a cosmetically effective agent,

one or more materials selected from a group consisting of 1,2-heptanediol, 1,2-nonanediol, and 1,2-decanediol, and

one or more materials selected from a group of ~~thymol~~, eugenol, citronellal, terpinyl acetate, citronellol and β -pinene;

wherein said cosmetics and toiletries are suitable for use on humans or animals.

6. (Previously Presented) Cosmetics and toiletries of claim 4, wherein said 1,2-alkanediol is 1,2-octanediol.

7. (Currently Amended) Medicine comprising:

a medicinally effective agent,

1,2-alkanediol having 5-10 carbons, and

one or more materials selected from a group of ~~thymol~~, eugenol, citronellal, terpinyl acetate, citronellol and β -pinene;

wherein said medicine is medicinally effective on humans or animals.

8. (Previously Presented) Medicine of claim 7, wherein said 1,2-alkanediol is 1,2-hexanediol and/or 1,2-octanediol.

9. (Previously Presented) Medicine of claim 7, wherein said 1,2-alkanediol is 1,2-octanediol.

10. (Currently Amended) Food, comprising;

a nutritionally effective edible substance,

1,2-alkanediol having 5-10 carbons, and

one or more materials selected from a group of ~~thymol~~, eugenol, citronellal, terpinyl acetate, citronellol and β -pinene;

wherein said food is edible and non-toxic to humans or animals.

11. (Previously Presented) Food of claim 10, wherein said 1,2-alkanediol is 1,2-hexanediol and/or 1,2-octanediol.

12. (Previously Presented) Food of claim 10, wherein said 1,2-alkanediol is 1,2-octanediol.

13. (Withdrawn) A method of using an antiseptic disinfectant, comprising the steps of combining 1,2-alkanediol with 5-10 carbons with one or more materials selected from a group of thymol, eugenol, citronellal, terpinyl acetate, citronellol and β -pinene to form an antiseptic disinfectant; and adding the antiseptic disinfectant to a cosmetic and toiletries, medicine or food.

14. (Withdrawn) A method of using an antiseptic disinfectant described in claim 13, wherein said 1,2-alkanediol is 1,2-hexanediol and/or 1,2-octanediol.

15. (Withdrawn) A method of using an antiseptic disinfectant described in claim 13, wherein said 1,2-alkanediol is 1,2-octanediol.

16. (Withdrawn) A method of using a cosmetic and toiletries, comprising the steps of providing an antiseptic disinfectant comprising
1,2-alkanediol with 5-10 carbons, and
one or more materials selected from a group of thymol, eugenol, citronellal, terpinyl acetate, citronellol and β -pinene;
combining the antiseptic disinfectant with cosmetically effective agent to form a cosmetic and toiletries to human or animal skin.

17. (Withdrawn) A method of using a medicine, comprising the steps of providing an antiseptic disinfectant comprising
1,2-alkanediol with 5-10 carbons, and
one or more materials selected from a group of thymol eugenol, citronellal terpinyl acetate, citronellol and β -pinene;

combining the antiseptic disinfectant with a medicinally effective agent to form a medicine; and

applying the medicine to human or animal skin or administering the medicine to human or animal.

18. (Withdrawn) A method of using a food, comprising the steps of
providing an antiseptic disinfectant comprising
1,2-alkanediol with 5-10 carbons, and
one or more materials selected from a group of thymol eugenol, citronellal,
terpinyl acetate, citronellol, and β -pinene;
combining the antiseptic disinfectant with a nutritionally effective edible substance to
form a food; and
feeding the food to human or animals.
